

xTAG™ Respiratory Viral Panel

Breathe Easy

Mid America Clinical Laboratories is the only laboratory in Indiana performing this testing.

Advantages of xTAG™ RVP

- **Unique** – the only FDA-cleared, PCR-based, 12 viral target assay on the market
- **Comprehensive** – tests for 12 different viruses and subtypes – covers virtually all major respiratory viruses commonly used in surveillance and clinical settings
- **Wide Patient Population** – routinely discussed as being first-line test for pediatric critical care situations; first-line test in immunocompromised and post-transplant patients; effectively manages respiratory viral infections in elderly population
- **Rapid** – provides results in 36 hours
- **Sensitive** – excellent sensitivity, including 96.4% for Influenza A₁ and 100% for RSV A and B
- **Eliminates Guesswork** – aids in ruling in and ruling out viruses suspected in respiratory infection. Assists clinicians in eliminating the “over-use” of antibiotics.
- **Robust** – capable of detecting and identifying multiple pathogens in a single sample. Dual and triple infections are easily detected.
- **Cost-effective** – one low price for information on all viral targets. Eliminates undetected infections and lengthy hospital stays.

Test Code: 51314

Misys Code (hospital in-patients): RVP

*CPT Code: 87798 x12

**FDA
CLEARED**

Viral Family	Viral Subtype
Respiratory Syncytial Virus (RSV)	A
	B
Influenza A	Non-specific Influenza A
	H1
	H3
Influenza B	
Parainfluenza 1	
Parainfluenza 2	
Parainfluenza 3	
Metapneumovirus	
Rhinovirus	
Adenovirus	
MS-2 Bacteriophage Internal Control	
Lambdaphage Positive Control	

Specimen Collection and Transport:

- Acceptable specimen source is **Nasopharyngeal** collected with a polyester/Dacron wire shaft swab.
- Preferred Media: BD VCM (Green Cap)
- Acceptable Media: Red Cap BD Universal VTM
M4/M4-RT Media
- If received in laboratory within 24 hours of collection, transport at room temperature. If more than 24 hours post-collection, transport specimen frozen.
